

Kanzul Mikban

A Manual of Geomancy ('Ilm al-Raml)

Transcribed and Compiled Edition

A Note on This Edition

This edition transcribes a handwritten manuscript notebook of geomantic ('ilm al-raml) divination methods, gathered under the title Kanzul Mikban. It has been prepared for readability while preserving the wording and structure of the original as closely as possible.

Reading the Geomantic Figures

Each geomantic figure consists of four lines, read from the top line to the bottom line as in the original. Each line is shown as a small mark: a single diamond for an odd (single-dot) line, or two diamonds side by side for an even (double-dot) line. For example, the figure below has an even, odd, odd, even sequence of lines, top to bottom:

A Note on Sources for the Figures

The dot-figures throughout this text were reconstructed from two sources: a direct, best-effort reading of the hand-drawn figures in the original manuscript photographs, and the compiler's own knowledge of the correct figure for a given named star, supplied directly during the preparation of this edition. Readers relying on this text for precise

ritual or divinatory use are encouraged to verify any critical figure against the original manuscript pages.

A Note on Chapter Numbering

The chapters in this edition are numbered to match the numbers handwritten and circled by the author directly on the manuscript pages themselves, rather than the numbering used in the notebook's own typed table of contents (where the same chapters were numbered nine places lower). The manuscript pages were taken as the primary source wherever the two disagreed.

A Glossary of Terms Used in This Book

This book assumes the reader already knows how to cast a geomancy chart, and moves straight into what each resulting chart means. If you have never encountered geomancy before, the terms below are used constantly throughout the chapters without being defined in the text itself.

The Chart and Its Houses

A completed chart is made up of sixteen positions, called houses and numbered h1 through h16. Each house holds one figure — a stack of four lines, each line either a single dot (an odd count) or two dots side by side (an even count). Casting the chart — the process that fills all sixteen houses from an initial set of markings — is not covered in this book and is assumed knowledge; what follows here is entirely about reading a chart once it has already been cast.

Elements

Every figure is also associated with one of four elements — Fire, Air, Water, and Sand (earth) — and many methods ask you to isolate a specific element from a house or group of houses rather than reading the whole figure.

Describing a Star

The book regularly describes a figure (also called a star) using paired qualities: opened or closed (a single dot is opened, a double dot is closed), upward or downward, good, bad, or middle-good, male or female, day or night, and stable or unstable. These qualities are used throughout to characterize a figure once it has been identified in a chart.

Groups of Houses

Several methods refer to the “first 4,” “second 4,” “third 4,” or “last 4” houses — meaning houses h1–h4, h5–h8, h9–h12, and h13–h16 respectively. A few chapters also use traditional names for these groups, for example Umuhat for the first four.

Named Figures and Special Techniques

Each of the sixteen possible figures also carries a traditional name (Adam, Ali, Umar, Mahadi, and so on), used throughout the book interchangeably with its dot-pattern. The book also refers to a handful of named techniques and constant figures used as recurring checks — among them Sirri Sa'ael (also called Damir), Itisal, Ifusal, and Nazir — and to sadaka, meaning a charitable offering, in several of the remedies given in the Dreams chapter.

Opening Invocation

In the name of Allah, the Most Gracious, the Most Merciful.

Alhamdulillah Always.

O Allah, bestow Your blessings upon our master Muhammad, the opener of what was closed, the seal of what came before, the defender of the truth with the truth, the guide to Your straight path, and upon his family, in accordance with his immense worth and lofty status.

This is a book called Kanzul Mikban, in the knowledge of geomancy.

Chapter One — Traveling, Business, and If You Will Return from the Trip or Not

Method 1: After drawing the chart, pick h1 and h8, then (h9 and h11), and add all of them. If it's a good and upward star, you will return with money and peacefully. If it's a good and downward star, you will return peacefully but without money. If it's a bad star, it's not good at all for you to travel.

Method 2: After drawing the chart, pick (h1 and h7) then (h4 and h8), add all, and check the result you get: if it's fire or air star, you will return with money; if it's water or sand star, you will come back with nothing.

Method 3: After casting the chart, pick h3, h7, h11 and h15 fire elements and form one star; then pick h3, h7, h11 and h15 air elements and form a star; then pick h3, h7, h11 and h15 water elements and form a star; then pick h3, h7, h11 and h15 sand elements and form a star. You will have 4 stars at the end — add them and check the star. If it's a good and single-dot star and also found in the chart, it means the trip is good and safe. But if it's a good double-dot star and also found in the chart, it means you will go and come in peace but you won't get money from the trip. If it's not found in the chart at all, it means it's not good to travel.

Chapter Two — If You Want to Know If You Will Get Money Today or Not

Method 1: After drawing the chart, pick h3, h7, h11 and h15 and add them. If the water or fire element is opened (single dot), you will get money that day; if it's not, you will not get money.

Method 2: After drawing the chart, pick h2 and h11 and add them. Add the result to h7 and check if it's in the chart — you will get money, but if it's not in the chart, you will not get anything.

Method 3: Pick h3, h7, h11 and h15 water elements and form a star. If the water or fire element of that star is opened (single dot), then you will get money; if it's not, you will not get money that day.

Method 4: Also, check your Sirri Sa'ael (Damir); if it's any of the stars below, you will get whatever you are asking for or about:

Chapter Three — Business, Profit, and Loss

Method 1: Pick (h1 and h5) then (h4 and h6). Add all and check: if it's a good star, you will get a lot of profit; if it's a bad star, you won't get any profit.

Method 2: Pick (h2 and h6), (h11 and h13), and add them. Then add the result to h16. If you get a good star and it's also found in the chart, you will get more profit from the business. If it's a good star but not found in the chart, it means you will go and come in peace but you will not get any profit. If it's a bad star, it means it's not good to travel at all or embark on that business trip.

Method 3: Also, after drawing the chart, check h2 and h6 — if you see a bad star in both houses, it means it's not good; but if it's a good star, it's good to embark on the business trip.

Chapter Four — Hunting in Water and on Land, and Searching for Anything

After drawing the chart, check h10. If you find the following stars,

it means you will be successful in your search: ,

. If it's any of the above stars, you will get whatever you are asking for or searching for — for example: job, money, title, promotion, marriage, etc.

Chapter Five — If You Will Win a Fight, War, or Court Case

After drawing the chart, check h6. If you see any of the following

stars there, it means you will win it: ,

. If you found any of the following stars in h1

and h8, it means it's not good and it will be difficult to succeed.

They are as follows: 

Chapter Six — If You Want to Know Where Your Enemy or a Thief Is Hidden

After drawing the chart, check h4 and h10. If you see any of the stars below in any of the houses, it means you will see or get

him/her in an opened land or desert: 

Chapter Seven — Marriage and Its Blessings

Method 1: After drawing the chart, pick h1, h7, h4 and h10, and add them. If you get a downward star and it's found in the chart, you will get her and it's good; but if it's an upward star and not found in the chart, it's not good for you.

Method 2: Pick h4, h8, h14 and h16 sand elements and form a star. If found in the chart, it's good; but if it's not in the chart, it's not good for you even if you get her/him.

Method 3: Pick h4, h6, h12 and h16 and add them. If your result is a sand star or fire star, it's good; if it's otherwise, it's not good for you.

Method 4: Check h7. If you see  , it means you will get a colored or white lady with a child. She's a sick person and will bring you a lot of financial difficulties. She will not get you a child nor blessings in the relationship or marriage. If it's  , it means you will get a short lady/man; she/he cannot stay in the marriage — there will be a divorce even if you marry her/him. If it's  , you will get a colored and beautiful lady; she will bring you lots of success and children. If it's  , you will get a dark lady far from your town — it's also a good marriage. If it's  , you will get a colored lady; it's good, but she will have too much jealousy and wouldn't want you to marry another.

Sub-topic: If She's Going to Stay in the Marriage or Not

Method 1: Pick h9 and h8 and add them. If you get an upward star, she will not stay forever; if it's a downward star, she will stay, insha'Allah.

Method 2: Pick (h2 and h7) then (h4 and h10), add them all, and check: if it's a good and downward star, she will stay and enjoy the stay. If it's a good and upward star, she will leave even though she enjoys the stay. If it's a bad and downward star, she will not enjoy the stay and will also not leave. If it's a bad and upward star, she will leave immediately because she will not enjoy her stay, and will leave faster than expected.

Chapter Eight — If One Will Stay in a Particular Place or Not, and If It's Good or Not

Pick h2 and h16 and add them. If it's a downward star, he/she will stay there forever; if it's an upward star, he/she will leave one day. If it's a good star, it's good to stay; if it's a bad star, it's not good.

Chapter Nine — Sickness (If He/She Will Survive)

Method 1: After drawing the chart, pick h4 and h6 and add it to h8. Add all and check: if it's a good star, it's sickness from Allah; if it's a bad star, it's from humans. If it's found in the chart, he/she has a long life; if not found in the chart, he/she will not survive it.

Method 2: After drawing the chart, pick h2, h5, h8 and h11 and add them all. If it's found in the chart, he/she will survive the sickness; if it's not found in the chart, he/she will not survive.

Method 3: If you find the following stars in h6, he/she will be

healed, insha'Allah:  ,  ,  ,  ,  ,  . But if

you find stars like:  ,  ,  ,  , it means it will be difficult for him/her to survive.

Chapter Ten — If Your Lost Thing Is Still Around or Is Gone

Method 1: Pick h1 and h5 and add them. If your result is found in the chart, it's still around you or still in town. If it's not found in the chart, it's out of town.

Method 2: Pick h5 and h16 and add them. If your result is an upward star, it's out of town; if it's a downward star, it's still around you.

Method 3: Pick h8 and h9 and add them. If it's a downward star and also found in the chart, then you will get it back; but if it's a downward star and not found in the chart, you won't see it, though

you may hear about it. If it's an upward star and found in the chart, you will hear about it.

Method 4: Pick h5 and h6 and add them. If it's an upward star, you will get it; if it's a downward star, you won't get it again. Also, if it's in the chart you will see it; if it's not in the chart you won't see it again.

Method 5: Also, pick h1 and h7 and add them. If it's found in the chart, you will get it back; if it's not in the chart, you won't get it again.

Note: If you found this configuration in h5 and h6 [written as "Musah" in the original — term unclear], it means you will get calamity/a fight, or a fire-burning problem, around you.

— If you want to know if you will get your lost money back or not —

Method 1: Pick h5, h15, h6 and h10 and add them. If it's a water star, you will get it again; if it's a fire star, you will get it but it will take a longer time; if it's an air star, there's a probability that you will get it again — you may only hear about it, far away. If it's a sand star, forget about it.

Method 2: Pick h2, h5, h8 and h11 and add them. If it's a good star and also found in the chart, you will get it early and easier. If it's a

good star and not found in the chart, you will get it but not early. If it's a bad or middle-good star and found in the chart, you will only hear about it but won't get it. If it's a bad star and not found in the chart, you won't see it or hear about it.

Method 3: Check h2 and h6; if both are downward stars, you will get it back; if they are not, forget it.

Method 4: Pick h6 and h9 and add them. If it's a downward star, you will get it back; if it's an upward star, forget it.

If You Want to Know If You Will Be Successful in Life, at Home, or Have to Travel Away from Home

Method 1: Pick (h1 and h2) then (h7 and h8) and add them. If it's a downward star, you will be successful at home; but if it's an upward star, you have to run from home.

Method 2: Pick the same stars above and add them. If it's water or sand star, stay at home; if it's fire or air, run from home.

Chapter Twelve — If You Want to Know If You Will Be Rich in Life or Not

Pick h1, h7, h4 and h8 and add them. If it's fire or air star, you will be rich; but if it's water or sand star, it will be difficult — you need serious prayers. If it's a good star but water or sand star, you will be feeding and clothing alright but you won't be rich. If it's a bad star and also water or sand star, you can only feed from hand to mouth — some will end up begging to feed. May Allah Almighty have mercy on us.

Chapter Thirteen — If You Will Get Children from a Lady You Want to Marry

Method 1: Pick h1 fire element, h5 air element, h4 water element, and h10 sand element, and form a star. If it's a good and downward star, and also found in the chart, you will get children early and many kids. If it's a good star but not in the chart, you will get kids but not early. If it's a bad star, you won't.

Method 2: Pick h1, h5, h11 and h14 and add them. If it's fire star, you will have kids very fast. If it's air star, you will get kids but it

will take a long time. If it's water or sand star, it will be difficult to have a kid with her.

Method 3: If you found the following stars in house 5, it means she

will get pregnant early for you:  ,  ,  .  ,  ,  . If it's  ,  ,  ,  , she will get pregnant early with no problems. If it's:  ,  ,  ,  , it takes time before she can get pregnant. If it's  ,  ,  , she will get pregnant early but it will be disturbing her — mostly it's jinn spirits that normally cause these problems. If it's  ,  , she will be getting miscarriages, or the kids will be dying — it's caused by witchcraft of enemies, sometimes jinn spirits, which is difficult to cure. If it's:  ,  , it's difficult for her to have a kid.

Method 4: Pick h6 and h10 and add them. If it's a downward star, she will (have kids); but if it's upward, she will not.

Method 5: Pick h2, h5, h7 and h15 water elements and form a star. If the water element is opened (single dot), she will — and if it's a good star too, she will — but if it's not, she will not have kids.

Chapter Fourteen — If a Pregnancy Is Going to Be Stable or Not (Good Condition)

Pick h1, h5, h4 and h10 and add them. If it's a good star, it will be stable; if it's a bad star, it won't. If you get the star in the chart, it's a genuine pregnancy; if it's not found, it's not a real pregnancy.

— If you want to know if it's really pregnancy or it's sickness —

Method 1: Pick h1, h5, h11 and h14 and add them. If it's fire star, it's pregnancy; if it's air star, it's sickness; if it's water star, it's meat, not a full human; if it's sand star, it's only blood. If it's a good star, it will be saved; if it's a bad star, it will be difficult to cure the sickness or the problem.

Method 2: Pick h1 and h6 and add them. If it's a good star, it will be successful; if it's a bad star, it's going to be a very serious problem.

Method 3: Check h4. If it's fire star, it's pregnancy; if it's air star, it's sickness; if it's water star, it's food or meat; if it's sand star, it's blood.

Chapter Fifteen — If Things Will Be Better for the Questioner or Not

Pick h(2 and h6), then (h3 and h7), then (h8 and h9), then (h13 and h15), then add them all. If you get a good star, you will be wealthy and have a good life. If it's a bad star, it will be difficult to be successful in life. If it's a middle-good star, things will be difficult and sometimes it will be better. If it's a bad star, it will be more difficult. If it's a good star, it's going to be blessing upon blessing. If the star repeats itself a number of times, it also shows how your life will be — whether it's a good, bad, or middle-good star.

Chapter Sixteen — If You Will Overcome Your Enemy or Not

Method 1: Pick (h1 and h12), (h8 and h13), and add all. If you get fire or air star, you will overcome him/her, and he/she will die. If it's water star, you will overcome him/her but he/she will not die. If it's sand star, you will never succeed — you cannot do anything to him/her. You will end up hurting yourself if you don't stop.

Method 2: Pick (h1 and h12), then (h13 and h14), and add them all. If you get a good star, you will be saved by Allah Almighty from his

charms and problems, and you are likely to overcome him/her. But if it's a bad star, please avoid him/her — you will be hurt if you try doing anything to him/her.

Chapter Seventeen — If Something Will Happen in an Hour, Day, Week, Month, or Year

Method 1: Pick (h1 and h6), then (h4 and h16), and add all. If you

get:  ,  ,  ,  ,  ,  ,  , then it will happen within an hour, or a day, or 1–10 days. If any of the above is found in the first four houses, then it will happen within an hour.

Method 2: Pick (h1 and h13), then (h4 and h12), then (h7 and h10),

then (h15 and h16), and add all. If you get:  ,  ,  ,

 ,  ,  ,  ,  in the first four stars, it will happen very fast — less than an hour, or an hour's time. But if it's

found in the chart, it will happen within 7 days. And if it's:  ,

 ,  ,  ,  ,  ,  ,  , then it will happen within a month or a year. If you use the method above and the star

is found in the chart, it means the year will be good; if not, the year will be hard.

Chapter Eighteen — If You Will Get Your Stolen Things Back

Part A — If they will steal you:

Method 1: Pick h4 and h10 and add them. If you get:  ,  ,  ,  , they will steal you no matter what happens; but if it's not any of the above stars, they won't steal you.

Method 2: Pick h9 and h10 and add them. If you get  ,  ,  ,  , don't do any business with your money — you will get defrauded. Or don't stay in that area — they will steal your money.

Method 3: Pick h1 and h5 and add them. If your result is in the chart, it means they will steal you; but if it's not found, they won't steal you — you can stay there and do your business.

Part B — If you will get your stolen things back:

Method 1: After casting the chart, pick h1 and h5 and add them. If your result is found in the chart, you will see them, or it's not gone far from you and you can still get them; but if it's not found in the chart, you won't see them again.

Method 2: Pick h7 and h8 and add them. If it's a downward star, you will get them back; but if it's an upward star, you won't get them again.

Method 3: Pick h2, h6, h9 and h16 and add them. If your result is found in the chart, you will get them; if it's not found in the chart, you won't see them again. Some scholars also say that after picking h2, h6, h9 and h16 and adding them: if you get a good and downward star, you will get them back peacefully. If it's a good and upward star, you will hear about them but you might not get them. If it's a middle-good or bad star, upward or downward, you won't get them back.

Chapter Nineteen — If You Will Win a Case in Court, Chief Palace, a Fight, or War

Method 1: After casting the chart, pick h1, h5, h9 and h14 and add them. If you get a good star, you will win the case. If it's middle-

good star, the case will keep long in court and you may win it with prayers. If it's a bad star, you will lose.

Method 2: Pick h8, h11, h7 and h16 and add them. Add the results to h1 and check if it's a good star — you will win the case; if it's not, you will lose it. If it's a middle-good star, you may win it with serious prayers.

Method 3: Pick h4, h5, h10 and h11 and add them. If you get: , , ,  in h4 and h10, you will win the case. But if they are found in h5 and h11, you will lose the case.

Method 4: Pick h8, h1, h9 and h11 and add them. If you get a good and upward star, you will win the case and even get money out of it. If it's a good and downward star, you will win the case without money. If it's a bad star, you will lose the case. Note: the above method (4) can also be used for travelling — that is, if it's a good and upward star, you will go and come in peace and with money; if it's a good and downward star, you will go and come in peace but you won't get money or profit from your trip. If it's a bad star, please don't travel at all — it's not safe.

Chapter Twenty — Who Will Win an Election or a Chieftaincy Title

After casting the chart, pick h1, h5, h9 and h13 and add them. If you get a good star, he/she will win; but if it's a bad star, he/she will not. Choose the one you want to win and name him/her first. If it's a middle-good star, it's going to be a bracket [too close to call]. If it's not found in the chart, it means the election might not come on schedule, or it will be delayed due to some misunderstanding. You can also use h10, h12, h14 and h15 and add them — same explanation as above.

Chapter Twenty-One — If Your Wife or Sister Has Had Sex or Not

Method 1: After drawing the chart, pick h6 and h16 and add them. Add the result to h7 and check if it's an opened star — she does have sex; but if it's a closed star, she didn't.

Method 2: After drawing the chart, pick h7 and h13 and add them. If the star's water line is active (water element is opened, meaning single dot), she does have sex; but if it's closed, she didn't.

Method 3: After casting the chart with your intention, check h7. If

you see  , it means she does or he does

have sex; but if it's:  , she didn't.

If It's Good to Stay in a Particular House

Method 1: After casting the chart, pick sand element of h4, h8, h14 and h16 and form a star. If it's a good star, it's good to stay; but if it's a bad star, please leave the house.

Method 2: After casting the chart, pick h8, h9, h2 and h6 and add them. If it's a good star, it's good to stay; but if it's a bad star, please run for your dear life.

Method 3: After drawing the chart, check if the downward stars are more than the upward stars — then you can stay; but if they are not, it's not good for you to stay.

Chapter Twenty-Two — If It's Good to Stay in a Town or Not

Method 1: After drawing the chart, check h4. If it's a good star, it's good to stay; but if it's a bad star, it's not safe for you.

Method 2: After casting the chart, count all the good stars in the chart. If they are more than the bad stars, you can stay; but if they are not, don't stay.

Chapter Twenty-Three — Is There Much Trees, Water, Sand, or Stones in the Area You Are Going To

After drawing the chart, pick h1, h7, h4 and h8 and add them. If it's fire star, the area has much stones. If it's an air star, the area has much trees. If it's water star, the area has much water. If it's sand star, the area has much sand.

Chapter Twenty-Four — If You Will Be Safe Entering a Canoe, or Will Get Fish from Fishing

Method 1: After drawing the chart, pick h10, h12, h14 and h15 and add them. If your result is a downward star, you may not return or come out of the water safely; but if it's an upward star, you will come out in peace.

Method 2: Pick h1, h5, h9 and h13 and add them. If it's a downward star, you or the whole people in the canoe are not safe and may not return. But if it's an upward star, you will be returned safely. Also, if it's a good and downward star, they will see all of you and bring you out of the water; but if it's a bad star, you won't even be seen. If it's a good and upward star, you will get more fish or money, and vice versa.

Chapter Twenty-Five — If There Are Armed Robbers on Your Way

After casting the chart, pick h9, h8, h12 and h16 and add them. If your result is a water star, then you don't have to travel — you may meet armed robbers on your way, which will involve bloodshed or accident.

Chapter Twenty-Six — If There Will Be a Fight, Argument, etc.

After casting the chart, check h2 and h1. If you found: , it means there will be a fight or misunderstanding in the family or

between some people in town. But if you found:  ,  in h9, it means there will be peace. If you draw a chart and your Sirri

Sa'ael (Damir) is  ,  ,  , it means you will have a fight with, or disagreement with, someone. If you found any of the above stars in h8, it means the fight is going to be very bad and may affect many people around you. If you found any of the stars above in h12, it means the fight may claim the life of some good people, or a person, in your family or around you. Get a red sheep or cow for Muslims to recite the Qur'an, for the whole family, to avert the

problem. If you found:  ,  ,  in h14, it means you will get a car, motorbike, bicycle, a horse, or something that can take you from place to place.

Chapter Twenty-Seven — About Farming and Food in the Year

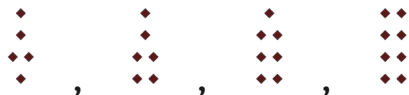

Method 1: After casting the chart, pick h1, h7, h4 and h8 and add

them. If you get stars of the East  ,  ,  ,  , it means they will get a bumper harvest in that year. If you get the

stars of the West: , West people will get a bumper harvest that year. If you get stars of the North , , people of the North will get a bumper harvest more than all in that year. If you get stars of the South: , , people from the South will get a bumper harvest in that year.

Method 2 — general harvest, calamity, and what kind (this year):

After casting the chart, pick h1, h5, h10 and h15 and add them. If

you get fire stars: , there will be good harvest, but locusts and grasshoppers are going to eat or spoil most of it. Write Suratul Falaq and Suratul Nass (7 times) each on paper and make it 5 layers. Bury them in the farm. Also write them the same number, wash them, and mix it with the things you are going to sow.

If you get air stars: , you will get a bumper harvest but animals (beasts) will eat or spoil a lot of them that year. Write Suratul Naba'a (1 time) each on 5 papers and make

them layers. Bury them in the farm. Also write it 5 times, wash it, and mix it with what you are going to sow.

If you get water stars  , you will get a bumper harvest but worms or maggots will eat or spoil a lot of them. Write Ayatul Kursiyy (9 times) on each paper and make them 5 layers. Bury them in the farm. Also write it the same number, and mix it with what you are going to sow. It also means that year's rainfall will not be much, which will cause a low harvest — pray a lot for rainfall in that year.

If you get sand/earth stars:  , you will get a bumper harvest and nothing bad will happen that year — no calamity will befall your farms, insha'Allah.

Chapter Twenty-Eight — If You Will Get Money or Good Strangers That Same Day or Not

After drawing the chart, pick the water element of h5, h7, h11 and h14 and form a star. Add it to h7 and check if it's found in the chart — it means you will get money or very good visitors that day. If the

water element of the star is opened (single dot), it's very close; but if it's closed, it will take a longer time. If the star repeats many times in the chart, it will happen early; if not, it will take a long time. If it's fire and downward star, a man will visit you with money — a child will also come to you with something like cooked food. If it's fire and upward star, you won't get anything except good conversation. If it's air star, a lady will visit you with gifts or money; after her, a man will come with a Sadaqa gift for you to pray for him. If it's water stars and the water element is opened (single dot), you will get something from the visitor; but if it's closed (double dot), you won't get anything. If it's sand/earth star, a man will come before the woman. In most cases they are always visitors that you already know, or family members.

Chapter Twenty-Nine — If You Will Be Successful Where You Are Going

After casting the chart, pick h3, h7, h11 and h15 and add them. If the element of the star you got is opened (single dot), then you will be successful in the place where you want to go; but if it's closed, it won't work. The stars that have their water elements opened

(single dot) are as follows: , , , , , ,
, 

Reading the Gift/Visitor Figures (continued from Chapter Twenty-Eight)

If you use the method above and get , it means your prayers and supplications are answered — it won't reach 7 days.

If you get , it means you will get something white like cloth or a shirt, money, etc. You will get the gift from a great person.

If you get , it means you will get an animal from an animal seller or buyer — you will get a lot of things from people.

If you get , it means you will get a beautiful lady — you will get something good from her, or... [text continues onto the next page, not yet transcribed]

...through her you will be successful. If you get: , it means you will get gold and diamond, or you will get animals, and after that you will get a lot of blessings.

If you get: , it means you will get all your requests from Allah without stress or time delay.

Chapter Thirty — If You Will Be Successful and Get What You Want from the Trip/Traveling

After casting the chart, pick h1, h8, h7 and h11 and add them. Add the results to h16. If the star is an upward star, it means the trip is

good and safe. And if the water element of the star is opened, it means you will get a lot of profit in your business trip. If the star is a downward star, please be patient — about a month or 10 days, or at least 3 days before you travel.

If it's: , it means you will get a lot of profit but it will not be

stable — you will lose it after that. If it's: , it means you will get a lot of money and benefits from the trip, but you will be very, very sick — you may spend all the money on the sickness.

Chapter Thirty-One — About a Lost Thing / Stolen Things

After drawing the chart, pick h4 and h5 and add them. If you get fire or air star, it means the thief is a male; but if it's water or sand star, it means the thief is female. If the star is found in the first 4 houses (mothers' houses), it means the thief is in the same house with you. If it's found in the second 4 houses (children's houses), it means the thief is in the same area with you. If it's found in the third 4 houses (Al-fafidat), it means the thief is in the same town with you. If the star is found in the last 4 houses (Sumurakat), it

means the thief is not in the same town with you — he/she is gone far away.

Chapter Thirty-Two — If It Will Rain Today or Not

Method 1: After casting the chart, check if Ali () is following each other in the chart. If they are, then it will rain.

Method 2: After drawing the chart, check h4. If you found Kallah Allahu () there, it is going to rain.

Chapter Thirty-Three — If Someone Loves You Much, Less, or Not at All

If you want to know if someone loves you or hates you and can harm you, make your intentions straight about it and make a long line, and start cancelling 4, 4, until it's equal to 4, 3, 2, or 1 dot. If it's one dot, he/she is your enemy and can cause harm to you. If it's 2 dots, he/she loves you very much and can stand for you in anything. If it's 3 dots, he/she is pretending to love you but it's not real love. If it's 4 dots, he/she does not love nor hate you.

Chapter Thirty-Four — If Your Enemies Are Working Against You or Not

Method 1: After casting the chart, pick h3, h7, h11 and h15 and use them to form new Umuhath (mother houses), and cancel the old chart. Use the Umuhath to form another chart, and check h13 of the new chart you have drawn. Check the water element of h13 — if it's opened (single dot) or closed (double dot). If it's a single dot, they are not working on you, or they are, but it's not working on you because you are spiritually active. But if it's double dots, they are seriously working on you to destroy you.

Method 2: After casting the chart, pick h1 and h12 and add them. If it is a good star, they are not working on you; but if it's a bad star, they are working on you seriously.

Chapter Thirty-Seven — How to Predict a Game, Who Will Win or Lose

Method 1: After casting the chart, put your team on the right side of the chart and your opponent's team on the left. After that, use h1 as your team and h2 as the other team. If h1 is a good star more than h2, it means your team will win; but if it's a bad star, it will not. If they are all good stars, it means both teams will score a draw. If they are all middle-good or bad stars, there will be a goalless draw or no win.

Method 2: After drawing the chart, pick h1 fire element, h2 air element, h3 water element and h4 sand element and form a star. Check where you can locate it in the chart. If it's on the right side, your team will win; but if it's not, your team may lose.

like: , you will get it but it won't be stable — it will leave you, or you will lose it as time goes on. If it's middle-good star, they will be tossing you up and down, or you will keep long before you get it. Forget it if it's a bad star — it won't work for you.

Method 2: Pick h1 and h5 and add them. If you get a good star, it's good to go; but if it's a bad star, don't go, please — it won't work for you.

After drawing the chart, check the fire elements of h5, h6, h8 and h9. If they are all opened, then something will burn, or it has already burnt.

Chapter Hundred and Twenty-Four — If Something Has Really Been Stolen or Not

Method 1: After casting the chart, check if you get( ,  ,  , ) in the chart. If so, it is true — it has been stolen. But if none of these stars is found in the chart, it means it's a lie.

Method 2: After drawing the chart, pick h1 and h5 and add them. If it is found in the chart, it's true, and vice versa.

Chapter Hundred and Twenty-Five — If They Will Return a Stolen Thing Back

After casting the chart, check h1 and h2. If they are both good stars, then check h7 and h8 — if they are bad stars, it means you will get the stolen thing back. But if h7 and h8 are good stars and h1 and h2 are bad stars, you won't get it again. If one of the stars in (h1 and h2) or (h7 and h8) is a bad or middle-good star, then check h2 — if it's a good star, it will be brought back; but if it's a bad star, they won't bring it back.

Chapter Hundred and Twenty-Six — The Number of Thieves

After drawing the chart, check h7. The number of times h7 repeats in the chart is the number of thieves.

Chapter Hundred and Twenty-Seven — The Description of the Thief

After drawing the chart, use h1 as the thief's description — a male star or a female star found there indicates a male or female thief. Some also use the star found in h7 for the description. [This passage was faint and heavily corrected in the original notebook — the general method is as above, but some detail may not be captured exactly; please check the original scan.]

Chapter Hundred and Twenty-Eight — If the Thief or the Stolen Thing Is in Town or Out of Town

After drawing the chart, pick h1 and check if it repeats in the chat as the thief. If it is found in the chart, he/she is still in town. If it is not found in the chart, he/she is gone out of town.

Chapter Hundred and Twenty-Nine — If It Is the Accused Person That Stole the Thing or Not

After drawing the chart, check h4. If it is a downward or stable star, then it is him/her; but if it's an upward or unstable star, he/she is not the one.

Chapter Hundred and Thirty — The Thief from Among the Accused People

Method 1: After drawing the chart, pick 2 people's names and place one on your right and one on your left. Then, after drawing the chart, check h4 — if it is a downward or stable star, then it's the person on the right; but if it's an upward or unstable star, it's the person on the left. If there are many people, do this for all of them.

Method 2 (directional method): After drawing the chart with that intention, place the accused people's names one on the East side and the other on the West side (see the diagram of the four directions in the original notebook). Draw the chart and divide it into two: the Umuhāt (houses 1–4) and any stars under them on

one side, and the Banat (houses 5–8) and any stars under them on the other. Count the single dots of each star on each side and check which side has more dots. If the East side has more single dots, that is where the thief is, and vice versa.

Chapter Hundred and Thirty-One — If Something Was Buried, or Has Been Buried, in a Particular Place

Method 1: After drawing the chart, check h4 and h6. If both are downward stars, it means something was buried there; but if they are not, nothing was buried there.

Method 2: Also, if h6 and h4 are good and stable stars, then something is buried there, and vice versa.

Method 3: Also, check h6 and h8. If both are downward stars, then something is buried there.

Chapter Hundred and Thirty-Two — If There's a Hidden Treasure (Gold/Money) in a Particular Place

Method 1: After casting the chart, pick h4 and h6 and add them. If it's one of the following stars, there is [treasure]; but if it's not,

there is nothing there. The stars are as follows: , ,

Method 2: Also, if you get , , or  in your chart, then there's something; but if it's not any of the above stars, then there's nothing there.

Method 3: Also, if your h1 is a downward star or a stable star, it means there's something; but if it is not, there's nothing.

Chapter Hundred and Thirty-Three — How Deep Something Is Buried

After drawing the chart, count all the single dots from h1 to h15 and start subtracting 12, 12. If your result is from 1 to 4, it means it is an

inch deep. If your result is from 5 to 8, it means an arm's length or a cubit deep. If your result is from 9 to 12, it means the height of a human being (stature/height deep).

Chapter Hundred and Thirty-Four — Where a Traveller Has Travelled To

After casting the chart, pick h1 and h7 and add them to h15. If the star is found in the first 4 houses (Umuhāt), it means he/she has gone to the East side. If it is found in the second 4 houses (Banāt), it means he/she has gone to the West side. If it is found in the third 4 houses (Hafidāt), it means he/she has gone to the North side. And if it is found in the last 4 houses (Sumurakat), it means he/she has gone to the South side.

Chapter Hundred and Thirty-Five — If the Traveller Has Travelled by Air, Water, or Land

After casting the chart, count all the dots of the air elements, the dots of the water elements, and the dots of the sand elements, and check which one has more dots. If the air dots are more, he/she travelled by air. If the water dots are more, he/she travelled by

water. If the sand dots are more, he/she travelled by car, train, motorbike, or bicycle, etc.

Chapter Hundred and Thirty-Six — If the Traveller Has Reached Where He/She Is Going or Not

After drawing the chart, check h1. If it's a downward star, he/she has reached home safely. If it's not a downward star, he/she has not reached yet. If house 1 repeats in h3 or h9, he/she is still on the way. If it repeats in h7, he/she has reached the town but not home yet.

Chapter Hundred and Thirty-Seven — If Someone Is Truthful or Not

Method 1: After drawing the chart, check h13 and h14. If h13 is a good star, he/she is telling the truth, or is a truthful person. But if it's h14 that is a good star, it means the querent is not truthful.

Method 2: Pick h1 and h5 and add them. If it is found in the chart, it is true (yes); but if it is not found in the chart, it is not true (no).

Chapter Hundred and Thirty-Eight — If a Prisoner Will Come Out of Prison and How Long It Will Take

After drawing the chart, check h6. If it's a good star, he/she will be removed from the prison. If h8 and h16 are bad stars, it will take a long time before he/she is removed.

After casting the chart, pick h1 and h3 and add them. If it is a good and upward star, he/she will be removed peacefully and happily. If it is a bad and upward star, it will take a longer time before they can remove him/her, with sadness and a lot of stress.

After drawing the chart, pick h1 and h3 and add them. If it's a good and downward star, he/she will stay in the cells for a while before

they remove him/her. If it's a bad and downward star, he/she is going for life imprisonment — it will be difficult to get him/her out of the prison.

Chapter Hundred and Forty-One — If the Prisoner Is Male or Female

After drawing the chart, pick h1 and h7 and add them. If it's a male star, he's a male, and vice versa.

Chapter Hundred and Forty-Two — Where Kidnappers Are Keeping a Person Hostage

After drawing the chart, check which star is found in its own

house. If it's:  , he/she is kidnapped in his/her own house. If

it's:  , he/she is in one of the closest houses, or a neighbor's. If

it's  , he/she is in one of his/her family members' house. If it's

 , he/she is in his/her father's or mother's house. If it's  ,

he/she is in one of his/her children's house. If it's  , he/she is

in a sick person's house, close to him or her. If it's , he/she is in his or her girlfriend's/boyfriend's, or wife's/husband's house. If it's , he/she is in a funeral house. If it's , he/she is on a journey — they are taking him/her somewhere out of towns. If it's , he/she is in a chief's, king's, or a well-known and respected person's house. If it's , he/she is in his/her ex's house. If it's , he/she is in his/her enemy's house — and so on, up to the end of the stars.

Chapter Hundred and Forty-Three — The Consequence of a Prisoner

Method 1: After drawing the chart, pick h1 and h6 and add them. Then pick h12 and h15 and add them. Then add all of them together. If it's a good star, it is going to be well after the prison; but if it's a bad star, it's not going to be easy after prison.

Method 2: Pick h3 and h12, then h1 and h4, and add them all together. If it's a good star, it's going to be well, and vice versa.

Chapter Hundred and Forty-Four — If You Will Get Your Debts, Deposit, or Savings Back

After drawing the chart, pick h1 and h7, then h2 and h8, and add them all. If it's a good star and repeats in the chart itself, they will pay you, or you will get the money back. If it's a bad star, they won't pay you, and you won't get the money back. If it's a middle-good star, it will take a longer time before you get it.

Chapter Hundred and Forty-Five — If Someone Will Get a Particular Position or Chieftaincy Title

After drawing the chart, pick h1 and h10, then h11 and h13, and add them all. If it's a good star, he/she will get it. If it's a middle-good star, he/she may get it with prayers. If it's a bad star, he/she will never get it. Allah knows best.

Chapter Hundred and Forty-Six — If You Will Own a House in Your Life

After casting the chart, pick h1 and h4, then h11 and h15, and add them all. If it's a good star, you will own a house in your life. If it's a bad star, you will never own a house. If it's a middle-good star, you will own a house with prayers and sacrifices.

Chapter Hundred and Forty-Seven — If This Apartment You Are Going to Is Safe/Good for You

After casting the chart, pick h1 and h4, then add it to h5. If it's a good star, it's good and safe. If it's a bad star, it is not. If it's a middle-good star, you have to do a lot of prayers and sacrifices (spiritual cleansing).

After casting the chart, count all the dots of h1, h4, h5, h7, and h15, and start subtracting 7, 7. If it's 1, that's Sunday; 2 is Monday; 3 is Tuesday; and so on through the week to Saturday. [The full day-by-day list runs off the edge of the scanned page — only the first three days are legible; please check the original for days 4–7.]

Pick h1 and h6 and add them to h10. If it's a good star, you will. If it's a bad star, you will not. If it's a middle-good star, with prayer you will get your place back.
